

FAERIE FOOD

&

HABITAT RENEWAL SPRAY

*A Blend of
Flower Essences
and Gem Elixers
to nourish and
help Faeries*

Faerie Built

Designed by the faeries, and brewed on a midsummer full moon this blend of Gem Elixers and Flower Essences is characterized by the care with which the faeries chose only the brightest, sparkliest and most colorful gems to create this formula. Imbued with the magic of a special full moon, this formula acts as a food for faeries, other nature spirits and mother earth. By spraying it in areas where faeries already live, it acts as a food and enables them to thrive in that area more easily. When sprayed in an area that has previously been uninhabitable to faeries it acts as a habitation renewal agent and helps them to move in and live, and eventually thrive.

Chains Of Light

The way the faeries explained it to me, was that the rainbow range of colors in the Faerie Food, enhanced by the brightness and super high sparkly nature of the original gems, create a formula that carries these colors and energies within it.

These colors act as basic building blocks, or color seeds for faeries. By seeding an area with these specialized colors it enables the faeries to reconstruct and reconnect the magical chains of light that link all the plants, rocks, water, ley lines etc, in a fully functioning and living environment.

The presence of these light chains are also essential for faeries to live & thrive in an area. The chains of light

share etheric energy between all that they connect, and this etheric energy running along the light chains provides the light (which acts as food) that faeries use to live and grow. Tending these chains is one of the most important tasks for faeries. It keeps an area balanced and alive with joy and in turn provides the faeries with ongoing light and joy and energy.

Earth Stewardship

Once upon a time faeries lived all across the planet, and played a major role in the stewardship and care of the earth. These chains of light also spread across the earth with the faeries. This formula was created to help the faeries regain their former range of habitation, heal the earth, bring more faeries into our lives, and help us heal ourselves. Spray directly from the bottle, or dilute and spray everywhere you want to. Allowing a spray or three to drift down through your aura is very pleasant. It also renews and strengthens your personal connection to nature spirits.
